little

Humidifier

Stadler Form®

SWISS DESIGN SINCE 1998

EVA little — the small, strong nebulizer

Selectable humidification of 30–75% or continuous operation

Auto mode, 5 output levels, hygrostat, Night mode

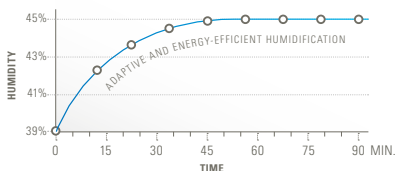

Tray for essential oils to diffuse fragrance into the room

ADAPTIVE HUMIDITY™ technology automatically adapts the humidification output in Auto Mode in order to reach and keep the desired humidity level quietly and efficiently

WITH ADAPTIVE HUMIDITY™ (VERY QUIET)

Despite her delicate stature, Eva little is very powerful. With a footprint of just two bars of chocolate, the little one disperses 320 ml of moisture per hour into the air. Eva little uses ultrasound technology to generate a visible mist that quickly increases the room's air humidity. The integrated hygrostat measures air humidity and adjusts it to the set value. Excessive humidification is therefore not a worry. The intelligent little air humidifier automatically, quietly, and efficiently achieves the target air humidity using adaptive humidification. Essential oils for aromatherapy can be used in the compartment designed specifically for this purpose. Eva little is rounded off with an anti-limescale cartridge and the cube for fresh water.
