Our »Barista in a box«:

The face for our exceptional Aroma Balance System

Three aroma profiles for even more pleasure, variety and taste

There is a little barista in our fully automatic coffee machines - with glasses, a bow tie and the knowledge about the perfect coffee for you. Or at least you can imagine it that way. Because our Aroma Balance System brings you an unknown variety of tastes - and that even with just one sort of beans. Just like a barista would do it. The difference are the pump pressure of 15 bar and the flowing rate of the water threw the freshly brewed coffee. And that's something you can taste - with every cup of coffee out of a NIVONA.

# NIVONA

a passion for coffee.
